PROFESSIONAL SUMMARY

Dedicated Engineering Technician combining a strong foundation in high-precision fabrication and electromechanical troubleshooting with advanced training in industrial automation. Experienced in programming Universal Robots and FANUC systems, building PLC logic, and utilizing SolidWorks for custom CAD design and rapid prototyping. A highly adaptable problem-solver currently completing an AAS in Robotics and Automated Manufacturing, eager to bring hands-on mechanical aptitude and technical precision to an innovative engineering team. **Currently enrolled at Lone Star College (North Harris) My availability is (Mon-Thu 1pm-9pm) And (Fri-Sun Open)**

SKILLS

JEFFERY BAKER

EXPERIENCE

May 2023 - May 2025

Welder Communications and Power Industries

July 2022 - April 2023

General technician 1 Txdot

October 2021 - July 2022

Order Selector Dollar General Warehouse

January 2021 - July 2021

Stocker Walmart neighborhood market

EDUCATION

Expected in December 2026

Associate in Applied Science (A.A.S.) | Robotics and Automated Manufacturing

Lonestar College, Houston, TX

Field Service Technician I Certificate Level I (Extra)

Graduate

Sabine High School, Gladewater, TX

HOBBIES AND INTERESTS

- **Electromechanical Troubleshooting:** Extensive hands-on experience with automotive restoration and general maintenance, requiring deep mechanical and electrical system diagnosis.
- **Robotics & Programming:** Hands-on programming of Universal Robots/FANUC systems and building personal robotics projects (e.g., custom-soldered microcontrollers and custom-designed enclosures).
- **CAD & Additive Manufacturing:** Modeling hardware in SolidWorks and optimizing 3D printing profiles for engineering-grade materials.
- **Tech & AI Trends:** Continuous learning through industry literature and podcasts focused on Artificial Intelligence and neuro-technology.
